

TandemPlex®

Multiplexed Tandem PCR (MT-PCR)

Efficient:
Maximum number of diagnostic targets per PCR run

Precise:
Patented technology for highest analytical sensitivity and specificity

Convenient:
Intuitive and user-friendly workflow

TandemPlex® Product portfolio

Reliable syndromic diagnostics

AusDiagnostics TandemPlex® panels are based on Multiplex Tandem PCR (MT-PCR) technology. MT-PCR offers unparalleled multiplexing capabilities and allows comprehensive and efficient diagnostics in the field of syndromic testing.

MT-PCR panels enable the detection of more than 30 different genetic markers in a single sample, as well as parallel detection and differentiation of bacteria, viruses and parasites.

Thus, reliable diagnostic results can be obtained within a very short time. At the same time, MT-PCR panels guarantee maximum sensitivity and specificity of the detected targets.

Well-designed, automatic system solutions, which can be flexibly adapted to the corresponding sample throughput, form the complete workflow - from sample extraction to the evaluation of the results.

Automation Product portfolio

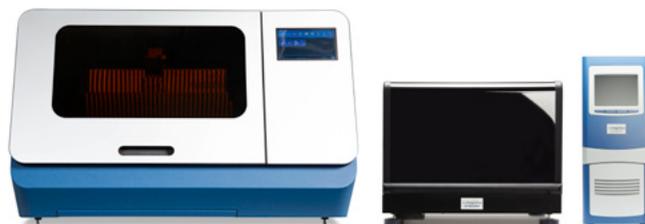

Highplex Alliance™ For low to medium sample throughput

The Highplex Alliance™ includes MT-Prep™ 24 for automated nucleic acid purification, the Highplex instrument for automated setup of the MT-PCR, as well as the MT-Analyser for running and analyzing the MT-PCR.

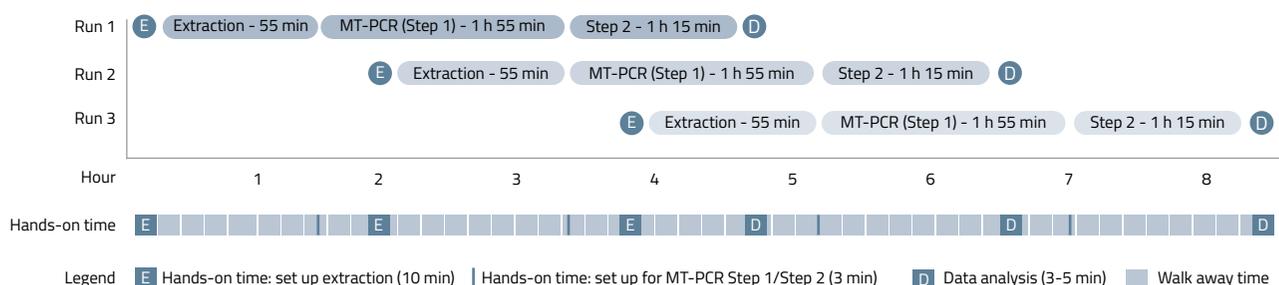

Simplify your daily laboratory routine with:

- Ready-to-use reagents and consumables
- Easy setup within a few minutes
- Maximized workflow efficiency by simultaneous use of instruments
- Automated analysis of results
- LIMS compatibility via data export option

Feature	Details
Extractions/run:	Up to 24 samples
Analyzable samples/run:	Up to 24 samples
Processing time:	30-55 min (extraction); 3 h 10 min (MT-PCR)
Hands-on time:	10 min (extraction); 10 min (MT-PCR)
Cost efficiency:	From 5-6 samples/run
Space requirements:	Approx. 90 cm (extraction) and ca. 50-80 cm (MT-PCR) width, depending on arrangement of instruments
Compatibility (MT-PCR Panels):	Compatible with all universal TandemPlex® MT-PCR Panels
Decontamination:	UV Sterilization of the deck to prevent contamination

Ultrplex Alliance™ For high sample throughput

The Ultrplex Alliance™ includes MT-Prep™ XL for automated nucleic acid purification, the Ultrplex 3 instrument for automated setup of the MT-PCR, as well as three MT-Analysers for running and analyzing the MT-PCR.

Simplify your daily laboratory routine with:

- Ready-to-use reagents and consumables
- Easy setup within a few minutes
- Maximized workflow efficiency by simultaneous use of instruments
- Automated analysis of results
- LIMS compatibility via data export option

Feature	Details
Extractions/run:	Up to 96 samples
Analyzable samples/run:	Up to 96 samples
Processing time:	75 min (extraction); 3 h (MT-PCR)
Hands-on time:	10 min (extraction); 10 min (MT-PCR)
Cost efficiency:	From 15 samples/run
Space requirements:	Approx. 135 cm (extraction) and ca. 155-250 cm (MT-PCR) width, depending on arrangement of instruments
Compatibility (MT-PCR Panels):	Compatible with broad portfolio of TandemPlex® MT-PCR panels
Pipetting mode (PCR setup):	multichannel pipetting for efficient sample processing
